SURGICAL LENSES

VITRECTOMY | SINGLE USE | ACCESSORIES

VITRECTOMY FOR A RETINAL DETACHMENT WITH MULTIPLE TEARS

A 25-gauge Vitrectomy was performed using the **Miniquad XL SSV**. After clearing the core and peripheral vitreous, PFCL heavy liquid was injected to flatten and stabilize the posterior pole. Vitreous attached to the margins of breaks was also removed. Air fluid exchange was done and endodrainage was carried out through an existing break. Once the retina was flat, 360° endolaser was carried out around the breaks.

Manish Nagpal, MD FRCS FASRS
Director of Retina Foundation,
Ahmedabad, India

INDIRECT VITRECTOMY LENSES

Volk offers a suite of vitrectomy lenses over a range of optical profiles, designed to cater to the full spectrum of vitrectomy procedures with the highest quality Volk optics for the best surgical visualization.

LENS	FIELD OF VIEW	IMAGE MAG	CONTACT DIAMETER	PRIMARY APPLICATION
HRX Vit Lens	130° / 150°	0.43x	11.35 mm / SSV 16.0 mm	Far-Peripheral Indirect Vitreoretinal Procedures
Mini Quad® XL	112° / 134°	0.39x	11.35 mm / SSV 16.0 mm	Indirect Viewing and Treatment of Peripheral Retinal Disorders
Mini Quad®	106° / 127°	0.39x	11.35 mm / SSV 16.0 mm	Indirect Viewing and Treatment of Peripheral Retinal Disorders
DynaView	95° / 127°	0.39x	8.08 mm	Treatment of Retinopathy of Prematurity
Central Retinal	73° / 88°	0.71x	11.35 mm / SSV 16.0 mm	High Magnification Indirect Viewing and Treatment of the Central Retina
Super Macula®	64° / 77°	1.03x	11.35 mm	Highest Magnification Indirect Viewing and Treatment of the Central Retina

HRX Vit Lens

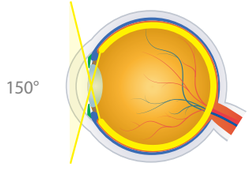
VHRXVIT **VHRXVITSSV**
Self Stabilizing (shown)

PRIMARY APPLICATION

Far-Peripheral Indirect Vitreoretinal Procedures

130°/150° FIELD OF VIEW | 0.43x IMAGE MAG

- High index glass delivers widest field, distortion-free retinal views of any surgical lens
- Small profile ring facilitates instrument manipulation and surgical procedures
- Available in standard and patented self-stabilizing contact (SSV®) options for best ergonomics
- Ideal for retinal detachments, PVR, giant retinal tears and works seamlessly in fluid and air filled eyes
- Available in autoclave sterilizable design (see page 52)



Mini Quad® XL

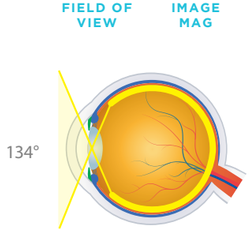
VMQXLVIT (shown) **VMQXLVITSSV** Self Stabilizing

PRIMARY APPLICATION

Indirect Viewing and Treatment of Peripheral Retinal Disorders

112°/134° FIELD OF VIEW | 0.39x IMAGE MAG

- Wide field of view of the entire retina including the ora serrata
- Ideal for retinal detachments, giant retinal tears, PDR, including diabetic cases requiring endolaser to the periphery
- Available in standard and self-stabilizing contact (SSV®) options for best ergonomics



"CRYSTAL CLEAR VISIBILITY & STABILITY

The Volk HRX and MiniQuad XL are my absolute go-to lenses for all my vitrectomy procedures. The wide-field view offered by these lenses allows for crystal clear visibility through all mediums such as fluid, air, PFCL, or silicon oil. Vitrectomy is all about *The View* and these contact lenses provide the best possible view to operate and to get optimum, distortion-free video footage for teaching and academics. Complex cases such as Retinal Detachments with PVR, Giant Retinal Tears, and Diabetic Tractional Detachments have become easier to manage as the Mini Quad XL and HRX lenses provide a seamless view of the extreme periphery to do a thorough clean-up and flatten the retina effectively. The self-stabilizing (SSV) component adds superb stability to this lens and I don't need any ring or assistant to support it for me. The only time I shift to another lens is when I want to do fine work on the macula like epiretinal membrane peeling or ILM peeling, which is when I move to the Volk Flat SSV lens for that part of the procedure to get the best magnified stereoscopic view of the macula."

- Manish Nagpal, MD FRCS FASRS
Director of Retina Foundation, Ahmedabad, India

Mini Quad®

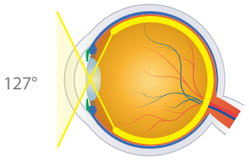
VMQVIT (shown) **VMQVITSSV** Self Stabilizing

PRIMARY APPLICATION

Indirect Viewing and Treatment of Peripheral Retinal Disorders

106°/127° FIELD OF VIEW | 0.39x IMAGE MAG

- Wide field of view of the entire retina including the ora serrata
- Smaller ring facilitates manipulation within the orbit
- Ideal for retinal detachments, PDR and giant retinal tears
- Available in standard and self-stabilizing contact (SSV®) options
- Available in autoclave sterilizable design (see page 52)



DynaView

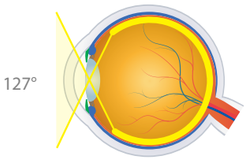
VDVVIT

PRIMARY APPLICATION

Treatment of Retinopathy of Prematurity

95°/127° FIELD OF VIEW | 0.39x IMAGE MAG

- Enhanced design provides wide field imaging out to the ora serrata
- Minified housing facilitates extension of instruments
- Reduced contact size ideal for pediatric examination and treatment such as bilateral retinal detachment, vitreous hemorrhage, ROP



Central Retinal

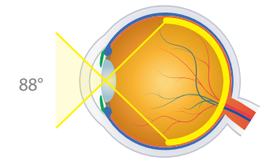
VCRLVIT (shown) **VCRLVITSSV** Self Stabilizing

PRIMARY APPLICATION

High Magnification Indirect Viewing and Treatment of the Central Retina

73°/88° FIELD OF VIEW | 0.71x IMAGE MAG

- High resolution, high magnification imaging to the equator
- Ideal for epiretinal membranes, diabetic membranes, vitreo macular traction, macular holes, submacular surgeries, and other small detail procedures of the central retina
- Available in standard and self-stabilizing contact (SSV®) options
- Available in autoclave sterilizable design (see page 52)



Super Macula®

VSMACVIT

PRIMARY APPLICATION

Highest Magnification Indirect Viewing and Treatment of the Central Retina

64°/77° FIELD OF VIEW | 1.03x IMAGE MAG

- High resolution, highest magnification imaging of the central retina
- Provides excellent magnification for fine peeling of epiretinal membrane as well as ILM. Ideal for macular holes, vitreo macular traction, and submacula surgeries
- 2x field of view compared to plano/concave direct image lenses

HIGH RESOLUTION (HR) DIRECT VITRECTOMY LENSES

Volk's High Resolution Direct Image lenses utilize a high-index glass to deliver superior image quality. This robust glass type is highly resistant to the rigors of continued steam sterilization and will not deteriorate or discolor.

Volk's No Stabilizing Ring (NSR) range of lenses allow suitable stability without the need for suturing or stabilizing rings. Two of the lenses in the group are also available in a no suture ring design. The profiles of these two lenses allows them to stabilize suitably without the need for an additional stabilizing ring.

LENS	FIELD OF VIEW	IMAGE MAG	CONTACT DIAMETER	PRIMARY APPLICATION

DIRECT VITRECTOMY LENSES

SELF STABILIZING (SSV)

Volk's Surgical Vitrectomy lenses were developed in collaboration with Dr. K.V Chalam and are available in 7 designs to meet all the visualization needs of a retina surgeon. The SSV® (self-stabilizing) contact element eliminates the need for sutures or rings and provides excellent stability. The compact lens design provides greater spatial access without interfering with instruments.

LENS	FIELD OF VIEW	IMAGE MAG	CONTACT DIAMETER	PRIMARY APPLICATION

SINGLE-USE SURGICAL BIO LENSES

Volk®1 Single-Use Surgical BIO lenses combine high-quality optics that Volk is known for and the convenience of pre-sterilization into a ready-to-use design. Volk's single-use surgical BIO lenses enable convenient pre- and post-operative examination and laser treatment.

These single-use lenses minimize the risk of infection and cross-contamination and reduce the cost and time associate with reprocessing.

Single-use lenses are pre-sterilized and individually-packaged in a Tyvek® pouch. Single-use lenses are sold in boxes of 10.

Volk®1 Single-Use 20D

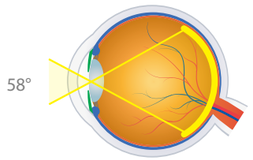
V20LCD10

PRIMARY APPLICATION

Industry Standard Diagnostic Lens in a Single-Use Format

- Perfectly balanced magnification and field of view make this lens ideal for general diagnostic examination
- Provides excellent views of the optic disc and macula
- Anti-reflective coating greatly reduces distracting glare

58°
FIELD OF VIEW



Volk®1 Single-Use 28D

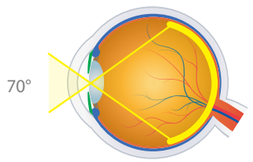
V28LCD10

PRIMARY APPLICATION

Fundus Scanning Lens in a Single-Use Format

- Excellent for wide field examination and treatment through a small pupil
- Compatible with LIO (Laser Indirect Ophthalmoscope)
- Excellent lens for ROP rounds to reduce infection risk in high-risk babies

70°
FIELD OF VIEW



"SAFE & EFFICIENT

Since the reports of using reusable lenses during Retinopathy of Prematurity (ROP) screening rounds were linked to infection transmission and serious adverse outcomes in the NICU, I have explored different options to maintain sterile equipment for use during my ROP screening rounds. I feel that the quality and field-of-view of the Volk Single-Use 28D lens is equivalent to the standard and I currently use a separate Volk Single-Use 28D lens for each infant during ROP screening rounds to reduce the risk of infection transmission between infants being examined. I have found that using Volk Single-Use 28D lenses for ROP screening rounds is more efficient than following a protocol to disinfect and reuse standard lenses between infants being screened."

- S. Grace Prakalapakorn, MD, MPH
Pediatric Ophthalmologist, Durham, NC, USA

SINGLE-USE DIRECT VITRECTOMY LENSES

Available in six popular designs, these lenses deliver high resolution direct-image retinal views for all vitrectomy procedures. Designed in collaboration with Dr. K.V. Chalam, the SSV® (self-stabilizing) contact design element eliminates the need for sutures or rings. They are packaged individually in easy-to-open single-use Tyvek® pouches and are boxed in quantities of 10 lenses. These single-use lenses minimize the risk of infection and cross-contamination and reduce the cost and time associate with reprocessing.
